Animals and humans alike have benefited from RB Rubber's resilient anti-fatigue flooring since 1985. The mats have been used by top trainers for dog agility practice centers and competitive arenas.

Rubber mats provide a durable, resilient surface for dog play, agility practice or competition while allowing easy clean-up for accidents. Anti-fatigue qualities from the mats reduce the amount of stress on the dog's joints, back and muscles as well as protecting the joints of their human caretakers.

Howliday Inn Doggy Daycare, Portland, OR

## dog daycare

Rubber mats in a daycare facility provide far more traction and sound reduction than a tile or linoleum floor. Rubber provides a solid floor that is comfortable for both dogs and humans.

RB Rubber Flooring is recommended for Doggie Daycares by the San Francisco Society for the Prevention of Cruelty to Animals for use in "Play" and obedience training rooms.

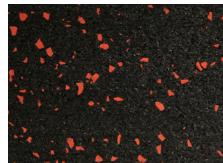

When our flooring is installed it is recommended that you seal the seams with a urethane based caulking adhesive that will create a "one piece" rubber flooring that is easy to clean, aesthetically pleasing, affordable and very durable. It will also ensure no waste is allowed to seep under the floor.

*"Our daycare is patterned after the SPCA of San Francisco... where we found out about your product. 2000 sq. ft. of our play area is covered in rubber mats from RB Rubber. These mats are the best, the dogs run and play and we never worry about them slipping and incurring any injuries. Clean up is a breeze!!! You have a wonderful product with multiple uses!!"*

# dog agility

Using rubber flooring for dog agility courses gives added traction, joint protection and shock absorption for the dogs (and trainers!) while running and jumping. Most agility facilities prefer to use the textured side of the mats for just that reason.

Matting used in the dog agility training facilities can be placed textured side up or smooth side up according to owner/installer's preference. Some trainers prefer the textured surface for added traction, however the smooth surface is easier to clean, especially in indoor installations. Both surfaces are very resilient and work well in agility applications in 1/2" or 3/4" thicknesses.

Tails U Win Dog Agility Center, Manchester, Connecticut

## tenderfoot™ pooch mat for outdoor kennels

Tenderfoot Pooch Mat was designed with every dog owner in mind for use in kennels, dog runs, or areas where pets play. The mats have been used by top trainers for dog agility practice centers and competitive arenas.

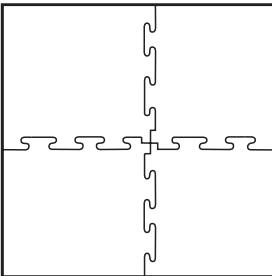

The 1/2" thick mats are made from recycled rubber. The bundles (or kits) of 4 interlocking mats are offered in the following sizes: 5' x 5', 4' x 6' and 3.25' x 6.75'. 15 kits per pallet. Approx. 75 lbs. per kit.

RUBBER MAT provides a durable, resilient surface that helps insulate your dog from ground moisture and biting insects.

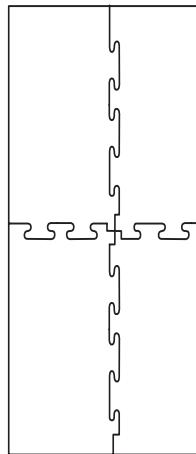

ANTI-FATIGUE qualities from the Pooch Mat reduce the amount of stress on the dog's joints, back and muscles while providing a non-slip surface.

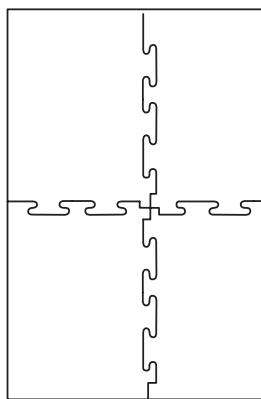

INTERLOCKING DESIGN - this exclusive feature is ideal for covering large or small areas while creating a uniform surface. Simply align, press and you're done!

5' x 5' Kit

3.25' x 6.5' Kit

4' x 6' Kit

RB recommends 3/4" thick product for agility use and 1/2" mats or 3/8" rolls for doggy daycare facilities. Although available, interlocking mats are not recommended for daycares due to the time involved to seal the seams for sanitation purposes. Factory sheared edges are more easily installed and provides the same protection.

Both liquid and solid "accidents" remain on top of the mats and are easily blotted up with a paper towel. Because the mats do not absorb the waste, remaining odor is nearly nonexistent.

#### PRODUCT SPECIFICATIONS:

Material: 100% Premium Recycled Rubber

Origin: Manufactured in the USA

Availability: Seven Warehouses Nationwide!

#### MATS

Surface: Smooth surface one side, anti-skid mesh texture on opposite side.

Thicknesses: 1/2" or 3/4"

Dimensions: 4' x 6' or 4' x 8'

Colors: Natural or Black

#### ROLLS

Surface: Smooth surface, both sides

Thicknesses: 3/8"

Dimensions: 4' x 25', 4' x 50' or 4' x 75'

Colors: Natural, Black, Color 17% Blue, Grey, Green, Yellow, Red

*RB Rubber also offers specialty knives, adhesive and sealants for installation ease and a highly concentrated cleaner/deodorizer for continual maintenance and sanitation of the mats. Call for more details on these great products!*

RB Rubber Products is a leading manufacturing company that sells high-quality, durable rubber flooring and other protective surfaces and products made from recycled tires. Over 4,500,000 unwanted tires per year are consumed and turned into a viable, usable product that can be recycled again and again.

## Cleaners

### CleanBreak

CleanBreak is a highly effective CONCENTRATED disinfectant - detergent. CleanBreak has a multitude of uses including; disinfection; mold and mildew; deodorizer; virucidal activity and inactivates Canine Parvo virus (CPV). CleanBreak will clean while disinfecting your surfaces. It has been formulated for safe use with domestic animals. Use on carpets, floors, floor coverings, walls, tiles, cages, pet beds, litter boxed, area rugs or any surfaces that have been soiled.

## ADHESIVE

### CX-941 & CX-948

Are one-component polyurethane-based, Structural, industrial grade adhesives. Elastomeric properties enable it to move with rubber as it expands and contracts. The patented formula is VOC compliant, nonflammable, and contains no solvents or water. It has freeze-thaw stability. Both adhesives provide excellent initial grab, and outstanding bond strength. It is formulated for indoor and outdoor applications on concrete, asphalt, rubber, cork, plywood, particle or chip board, cement, gypsum underlayment, and over radiant heat flooring

## Sikaflex - 227

### Sikaflex - 227

Sikaflex - 227 is excellent for many adhesive applications and can be used without a primer. Sikaflex - 227 is a premium-grade, high-performance, moisture-cured, single-component, polyurethane-based, non-sag elastomeric sealant. Meets Federal specifications TT-S-00230C, Type 11, Class A. Meets ASTM C-920, Type S Grade NS, Class 25, Canadian Standard 19-GP-16A, Type 11. 10.3 oz. tube.

*"We have been using RB Rubber mats for 3 years now in our agility training facility and cannot recommend a better surface for training and jumping. They are easy to maintain, stay in place and are indestructible."*
