

CU800 Fitness Bike

CU800 Fitness Bike

The **CU800** was specifically engineered for the commercial environment, from its heavy duty steel frame to its durable powder coat paint finish. The design focuses on convenience, comfort, and durability.

Other design elements include:

- Contact & Telemetric heart rate capabilities to make the workout more effective
- Generator powered console means there is no need for electricity
- 2° of inversion at the padded foot pedals places the user in a comfortable, anatomically correct position
- A dual spring seat with fore/aft adjustment for extra comfort and a custom fit
- 30 lb. flywheel combined with the weight of each crank arm produces the ideal amount of inertia
- 40 levels of resistance to satisfy the needs of beginners or advanced exercisers

This model is very appealing to users that value a smooth ride and extensive data feedback. The console is identical to the **CR800** fitness bike & **CE800** elliptical trainer, which makes programming very familiar when using any Spirit Fitness C series products.

CU800 w/
TV Bracket
Bracket sold separately

CL800 Fitness Bike

As with any product, a major importance is the user interface. We focused on making everything easily accessible, convenient, and comfortable: A storage tray for a phone, keys, or an MP3 player, ergonomically friendly pulse grip posts for a more natural hand position, and a Turbo cooling fan to keep your clients cool and encourage them to workout longer.

A quick press of a button and your clients are off on a manually controlled ride or one of the many specialized workouts such as the Fit Test or Constant Power programs. Our large, bright LED console gives your clients constant feedback from calories to distance to time.
