

XBR95 Fitness Bike

XBR95 Fitness Bike

Indoor exercise bikes have been around for decades. Their appeal and effectiveness have stood the test of time. The **XBR95** was designed to assure optimum comfort to help you achieve your fitness goals.

Spirit Fitness designed semi-recumbent bikes so that all of the adjustments can be made from the seated position, and all of the key features can easily be reached while working out. Below are a few of those features.

- A bright blue backlit LCD console offers a multitude of feedback data
- Remote resistance controls make adjustments more convenient
- Convenient squeeze-grip handles adjust fore/aft seat & reclining backrest positions
- A muscle activation figure that shows which areas are being targeted
- A heart rate bar graph that makes it easier to maintain your heart rate zone
- Included wireless telemetric heart rate chest strap is ideal for monitoring exercise intensity
- Generator power system eliminates the need for electricity
- An audio jack and speakers for personal entertainment
- Multiple storage areas for organization

Squeeze-Grip
Adjustment Handles

XBR95 Fitness Bike

As with any product, a major importance is the user interface. We focused on making everything easily accessible and comfortable: Multiple storage areas for beverages, keys, a phone, or an MP3 player; ergonomically friendly pulse grip sensors for a more natural hand position, and a cooling fan to keep you cool and encourage you to workout longer.

A quick press of a button and you are off on one of the unique programs. Our large, easy to read console even features a muscle activation figure that specifies which muscle groups are minimally or maximally activated at different levels and a heart rate bar graph that simplifies staying in your target zone.
