

# Solution based products for today's health clubs.

For over a decade Hampton Fitness Products has committed itself to providing solutions for the consumer and club owner alike. In 2009 we will introduce one of the most efficient group exercise products to date:

## The Gel-Pump-System

### The Rack

The racking system measurements are 52 inches in width, 48 inches in height and 24 inches in depth. This unit is also equipped with optional casters for transporting it from your storage facility to your group exercise classroom if needed. The frame is made from heavy 12 gauge steel with a standard frame color in black. Other color options are available so please contact Hampton Fitness Products for details. The plates and collars are secured by a 1/4 inch nylon coated rip cord and lock.

### The Bars

The premium bar in the Gel-Pump-System comes standard with 7 Poly-Urethane grips that can be completely sanitized after each class, to ensure your members that ALL germs and bacteria have been eliminated. These grips also eliminate the guesswork when positioning your hands during your workout. The Poly-Urethane grips are backed by a 5-year commercial warranty.

### The Collars

The *Lock-Jaw* Barbell Collar is specifically designed for commercial use and is backed by a LIFETIME commercial warranty. The Cam Locking System utilizes 1-inch wide solid rubber pads, that are permanently captured in the molded resin frame. This innovative locking system creates 400% greater retention force than spring collars so it won't lose its grip. Additionally the large cam lever lets the user quickly and effortlessly install or remove the collars.

### The Plates

The plate design consists of six sides to prevent rolling when in operation. The multi-colored urethane coated plates are easy to identify anywhere in the facility. The plate increments are 10 pounds, 5 pounds, and 2.5 pounds. The key feature to the plate design, besides the anti-roll feature and the vibrant colors, is the stainless steel center hub which makes this product user friendly when loading and off-loading the plates during class. 40 of each plate are provided in the club pack that is designed to hold more sets if needed.

### The system

This system was designed to bring both life and energy to your group exercise classes. Backed by a 5-year commercial warranty the Gel-Pump-System is one of the strongest investments that you can make. In adverse times, members are looking to invest their time and money into clubs that are able to offer the best amenities. Make a difference in your club today...the HAMPTON difference.
